### SUMMARY

Creative and detail-oriented Fresher 3D Artist and Graphic Designer with practical knowledge of Blender and Canva. Skilled in 3D modeling, low poly asset creation, texturing, and basic game design. Seeking an opportunity to begin my career in a creative environment where I can apply my design skills, learn industry workflows, and contribute to game art and visual design projects.

### PROJECT

#### Stock Car Running

2024

Tools Used: Unreal Engine, Blender

#### Project Overview:

Created a basic racing game project where the player must reach the finish line within a limited time. The game included 2 levels and focused on simple gameplay flow and environment setup.

#### Role & Contribution:

- Designed and created 3D models
- Worked on game design elements
- Supported asset creation and scene setup
- Contributed to the visual structure of the game environment
